EXPERIENCE

Junior Gameplay & Tools Developer

Dec 2024 – Aug 2025

Noxart Games

Remote

- Built interactive gameplay systems and UI components in a custom Python-based MVC engine.
- Implemented modular logic systems using Lua and TypeScript, focusing on responsiveness and clean structure.
- Worked in a small agile team, collaborating with designers and artists for fast prototyping and iteration.
- Debugged, optimized and structured systems for stable real-time behaviour.

Software Development Intern

Jan 2024 – Mar 2024

NTT DATA Business Solutions

Istanbul

- Developed backend logic with Java and Spring Boot in an agile team environment.
- Applied clean code, OOP and algorithmic principles to improve structure and maintainability.

Backend Development Intern

Jul 2023 – Sep 2023

D-Engage

Istanbul

- Implemented & tested C# .NET Core APIs with SQL & Entity Framework for production systems.
- Designed secure, scalable REST endpoints and performed structured debugging.

PROJECTS

ChronoDash (Indie Project)

github.com/TalhaY61/ChronoDash-Unity

Modular Runner – Event-Driven Architecture

Unity, C#

- Implemented interaction logic, UI/UX elements, transitions and responsive gameplay feedback.
- Used ScriptableObjects, event-driven systems and object pooling for smooth real-time performance.
- Set up scenes including lighting basics, materials, collisions and optimized prefab structure.

TimeShift (Game Jam Project – Rank 53/437)

talhay61.itch.io/timeshift

Puzzle Prototype with Time-Shift Interaction

Unity, C#

- Built a complete interactive prototype in 10 hours, demonstrating fast iteration and clear structuring.
- Implemented time-based state switching affecting puzzles, physics and player flow.
- Created UI, transitions, feedback systems and core interaction logic.

GODO

github.com/TalhaY61/GODO

Gamified Productivity Web App

React, C#, .NET, MySQL

- Built an XP-based interactive task manager with item shop and visual feedback systems.
- Implemented modular REST APIs with JWT authentication and scalable backend structure.
- Designed relational data models supporting items, XP, tasks and inventories.

EDUCATION

Technical University of Darmstadt

Darmstadt, Germany

M.Sc. in Computer Science

Oct 2024 – Present

Turkish-German University

Istanbul, Türkiye

B.Sc. in Computer Science

Oct 2020 – Jul 2024

SKILLS

Programming Languages: C#, Java, Python, Lua, SQL, TypeScript

Game Engines & Tools: Unity (2D/3D basics), LÖVE2D, URP, ScriptableObjects, Git/GitLab

Backend & Tools: .NET Core, Spring Boot, REST, MySQL, PostgreSQL

Spoken Languages: German (native), Turkish (native), English (B2)
